IDENTIFIERS	Ohio

ABSTRACT

Providing information for simulation activity, the materials in this document are intended to help train administrators in the utilization of a set of reporting/planning forms developed as a statewide model for local school district use in vocational education planning and development in Ohio. The information is presented in three parts: state information, information concerning school district "C" (a set of data based on a hypothetical school district), and information concerning the joint vocational school in district "C". The state information section provides data concerning vocational education standards, costs per pupil in average daily membership, equipment and depreciation costs, space requirements, and environmental assumptions. School district "C" information section provides hypothetical data, e.g., high school and adult vocational enrollments; labor demands; school district population; percentage of graduates actually entering baccalaureate or associate degree programs; vocational choice inventory; and follow-up of students. The joint vocational school information section provides data on high school and adult vocational enrollments, costs per pupil in average daily membership, and follow-up of students. (Simulated sets of data based on an individual school district and a contract district are included in two companion documents, CE 014 094 and CE 014 095. Copies of the forms are included in the report of the model plan's development (CE 013 048), and detailed instructions for their use are in CE 014 093. (BM)

Documents acquired by ERIC include many informal unpublished materials not available from other sources. ERIC makes every effort to obtain the best copy available. Nevertheless, items of marginal reproducibility are often encountered and this affects the quality of the microfiche and hardcopy reproductions ERIC makes available via the ERIC Document Reproduction Service (EDRS). EDRS is not responsible for the quality of the original document. Reproductions supplied by EDRS are the best that can be made from the original.

These materials are the result of EPDA Project Number 72052.

PREFACE

Since 1970, all school districts have formed Vocational Education Planning Districts. The Vocational Education Planning District in Ohio can be categorized as follows: 1. The individual school district which has sufficient student capacity to plan an adequate program of vocational education; 2. The contract district, which allows any number of school districts to contract for vocational education with a sponsoring school district which is responsible for providing an adequate program of vocational education; and 3. The joint vocational school district, which requires at least two school districts to join together to provide a common board of education with taxing authority for the specific purpose of providing an adequate vocational education program.

The need today for educational programming and planning is soundly being heard throughout the numerous educational communities. Vocational education is willing to meet the challenge for program planning and management for short-term and long-range planning. The State of Ohio through the State Department of Education, Division of Vocational Education, is most interested in having viable and realistic local as well as statewide planning. Through this EPDA Project, systematic local planning and programming for vocational education will be compatible with the state plan format. Systematic planning must remain an integral part of all vocational education efforts if it is to achieve the mandated mission of meeting the vocational needs of all the people.

In 1966, there were 71,446 high school students enrolled in 1,767.18 units of vocational education. Today, there are 218,590 high school students enrolled in 6,410.15 units of vocational education. Included in this number are 115,407 high school students enrolled in job training vocational programs.

The primary purpose of this EPDA Project is to develop, test and implement a planning process which will assure quality vocational education in Ohio through the combined efforts of local and state personnel. The Reporting/Planning form is designed to assist administrators, supervisors, and state personnel to plan for quality vocational education. The following materials will provide information for simulation activity when used with the Reporting/Planning form.

STANDARD EDb-463-01

Each plan must provide for vocational education for eligible students based upon the following percentages by September 1, 1974:

Percent of Graduates Entering College or Degree-Granting Higher Education Programs	Percentage of Students for Whom Vocational Education Will Be Planned by September 1, 1974
50% or Less	40%
50%-60%	30%
60%-70%	20%
70% or More	10%

STANDARD EDb-463-02

Plans proposed shall provide for a minimum of 12 different vocational education offerings providing 20 classes of vocational education under the Foundation program, with no more than four of these offerings to be provided entirely by cooperative education methods.

STANDARD EDb-463-03

All plans shall include provisions for vocational education services to all districts or combinations of districts within individual county or multi-county areas represented by the plan. All programs proposed to meet the minimum standards for vocational education in the plan shall meet the criteria for vocational education programs as approved by the State Board of Education.

STANDARD EDb-463-04

No school district or combination of school districts shall be considered for the allocation of construction, remodeling and equipment funds from state or federal sources unless such a district or combination of districts has a minimum of 1,500 students in the upper four years of school. Because of the limitation of funds, districts or combination of districts with a minimum of 3,000 students in the upper four years of school will be given priority.

STANDARD EDb-463-05

Any plan submitted on the basis of contracting between districts shall include:

A. The provisions for physical facilities for the vocational programs by one or more of the boards of education with one participating school providing for no less than 10 programs and 16 classes.

B. The tax source for building needed vocational facilities and an agreement that each district will guarantee to pay a participation fee for students annually to the district which will be offering the vocational education program based upon the following formula:

1. Districts enrolling 60% or less of graduates in degree-granting higher education programs will guarantee to pay a participation fee to the district or districts which will be offering the vocational education program for a minimum of 20% of the 11th and 12th grade enrollment.

2. Districts enrolling 61 to 75% of graduates in degree-granting higher education programs will guarantee to pay a participation fee to the district or districts which will be offering the vocational education program for a minimum of 15% of the 11th and 12th grade enrollment.

3. Districts enrolling 76 to 90% of its graduates in degree-granting higher education programs will guarantee to pay a participation fee to a district or districts which will be offering the vocational education program for a minimum of 10% of the 11th and 12th grade enrollment.

4. Districts sending 91% or more of its graduates to degree-granting higher education programs will guarantee to pay a participation fee to the district which will be offering the vocational education programs for a minimum of 5% of the 11th and 12th grade enrollment.

5. Districts that develop a cooperative plan for providing vocational education programs, in which provisions other than (1) through (4) above are desirable, may establish mutually agreeable fiscal arrangements. Fiscal arrangements shall be stated in the plan.

6. The initial contract arrangements between boards of education under this section shall be for no less than 5 years, renewable on the basis of 5 year periods. Contracts between boards of education, however, in cases where one board of education has obligated funds for the construction and for equipping of vocational facilities, must cover a period of years necessary to amortize the obligation.

Any changes in contractual arrangements during the life of a contract must have approval of the participating districts and the State Board of Education.

Participating districts are responsible to pay participation fees based upon the formula above even though less than the formula number of students participate in vocational classes in the vocational center.

STANDARD EDb-463-06

The county superintendent, the joint vocational school district superintendent where a jointure exists, and the superintendent of the city enrolling the largest number of students within the county shall be charged with establishing a committee including representation from all school districts in the county or counties to develop a plan for the county or in cooperation with one or more of the adjoining counties. The county superintendent shall be responsible for arranging the first meeting with the superintendent from the city and the joint vocational school district in order to initiate the planning. The county superintendent of the most populous county in each vocational district identified in the broad plan proposed by the Governor's Committee on Vocational Education shall take the initiative in contacting the county superintendents of the other counties to arrange a meeting of the districts encompassed in the area. At the first general meeting of superintendents arranged by the committee outlined above, a chairman shall be elected by the group. The elected chairman shall be responsible for coordinating the districts involved. The planning committee for vocational education may establish such additional committees and planning activities as are deemed advisable.

STANDARD EDb-463-07

The legal base for planning procedure, standards, and other materials shall be transmitted to all superintendents in Ohio before the 20th of the month in which standards are adopted by the State Board.

STANDARD EDb-463-08

Planning committees are to be initiated by all districts or combination of districts, counties or multi-county units not later than the 15th of the month following receipt of the planning materials.

STANDARD EDb-463-09

Plans must be submitted to the State Board of Education in accordance with the provisions of Section 3313.90 R.C. by April 1, 1970.

STANDARD EDb-463-10

Plans shall be reviewed by the Division of Vocational Education in terms of the standards for districting. Adjustments shall be made in the plans in cooperation with the local education agencies and recommendations made to the State Board concerning the plans no later than June 8, 1970.

STANDARD EDb-463-11

Plans from an individual district or combination of districts, a single county or multi-counties may be submitted to the State Board of Education any time after the approval of the

planning procedures, providing such procedures are submitted to the State Department of Education, Division of Vocational Education, by the 15th of the month prior to the month in which they are to be considered by the State Board of Education. The State Board, upon recommendation of the Superintendent of Public Instruction, and upon determining that the plans meet the standards for districting, may approve the plan submitted, and make the districts eligible for operation allocations, construction and equipment allocations, or both.

STANDARD EDb-463-12

State Board procedures for the approval of requests for construction and equipment funds and for the submission of these requests for approval of the State Board of Control shall be as follows:

A. Funds shall not be allocated until the district or area plan for Vocational Education has been approved by the State Board of Education.

B. After approval of a request for funds by the State Board of Education, a request shall be made to the State Board of Control for release of funds for the project.

C. Any district adversely affected by the determination of the Division of Vocational Education or action of the State Board of Education may follow the procedure for appeal as outlined in Chapter 119 R.C.

D. Procedures for applying for allocation of State Bond Issue funds to match funds from the Bureau of Vocational Rehabilitation shall follow the same procedures as for the allocation of construction and equipment funds.

STANDARD EDb-463-13

Special consideration may be given to any creative or exemplary cooperatively developed plan or plans to establish, maintain and finance a comprehensive vocational education program for all eligible students through the granting of exceptions to those standards which tend to inhibit the implementation of a plan which best serves the needs of students in such areas. Special consideration may also be given to one or more counties in which compliance with one or more standards would result in unreasonable transportation time and costs.

STANDARD EDb-463-14

In grant programs which support the provision of health, education or welfare services, discrimination in the selection or eligibility of individuals to receive the services, and segregation or other discriminatory practices in the manner of providing them, are prohibited. This prohibition extends to all facilities and services provided by the grantee under the program or, if the grantee is a State, by a political subdivision of the State. It extends also to services purchased or otherwise obtained by the grantee or political

sub-division and to the facilities in which such services are provided, subject, however, to the provisions of 80.3 (e). Sec. 602, Civil Rights Act of 1964, 78 Stat. 252; 42 U.S.C. 2000d-1.

STANDARD EDb-463-15

Exemptions to the minimum requirement of 1,500 students in grades 9 through 12 may be made by the State Board of Education based on sparsity of population or other factors indicating that comprehensive educational and vocational programs can be provided through an alternate plan.

Tele-Communications	3,000	2/3	50,000**
Welding	4,000	2/3	30,000

* Does not reflect cost of airworthy aircraft.

** Does not include necessary industry contributions.

To Determine Cost of Construction:

Add the square feet of all labs and related classrooms. Divide this sum by .7 to calculate the total square feet. Add the square feet of the kitchen, lunch room, or library, if applicable, to the total square feet. The Cost of Construction per square foot ($25.00) multiplied by the total square feet will equal the Cost of Construction.

NOTE: This does not include site, architect or equipment costs.
